AcisTek Corporation's GSA IT Schedule 70 Contract Extended

GSA Awards AcisTek Corporation 5 Year Option Extension on Government-Wide IT Services Contract

ARLINGTON, VIRGINIA – February 2, 2016 -- AcisTek Corporation (AcisTek), a leading provider of IT professional services to the Federal Government, has been awarded a five-year extension to their small business IT Schedule 70 prime contract by the U.S. General Services Administration (GSA). AcisTek's contract is under GSA's Special Item Number (SIN) 132-51 for IT Professional Services. SIN 132-51's services include database planning and design, systems analysis and design, network services, computer systems analysis, computer programming, software engineering, conversion and implementation support, network services project management, and data/records management, among others.

Coupled with their status as an 8(a) prime contract holder for several Federal agencies, AcisTek demonstrates its status as a preferred IT Services Provider through this contract extension. IT-70 is one of the largest and most widely used government-wide acquisition vehicles, with over \$14B in awards issued through the contract in FY2015.

This five-year option extension illustrates AcisTek's value to the Federal IT marketplace, and is aligned with the company's focus on increasing client performance through the delivery of rapid solutions development, information technology, and consulting services. AcisTek has used IT-70 over the past several years to cultivate its core capabilities, offerings, and expertise at a great value to federal customers, and will continue to do so over the next five years.

AcisTek's CEO Al Horowitz commented:

"Our IT-70 option extension provides a broadly accessible contract vehicle for our federal clients. As a growing 8(a) IT professional services firm with a proven track record of helping clients increase performance, we are thrilled to provide a strategic, flexible, and easy-to-use vehicle to access our broad range of service offerings. This will ensure that AcisTek remains accessible to current and potential new clients through IT-70, supplementing our 8(a) prime contractor status with another government-wide acquisition vehicle."
